L0PX0101 Obelix Danfoss Proportional Solenoid Module Ex ib Intrinsically Safe I/O Analog Inputs 12 Bit Type A

The Obelix Mining PLC I.S. I/O Module provides intrinsically safe (Group I Ex ib) input and output resources in a single, compact unit.

A unique fiber-optic communications interface means that the module and dedicated I.S power supply can be conveniently segregated into its isolated zone.

The fibre-optic link between the module and an Obelix processor module provides real-time control and monitoring of all I/O points.

This solution is ideal for mobile mining equipment where limited installation space must be managed.

Uniquely Keyed Type Connectors to prevent incorrect machine installation.

The module is Dual Obelix Type which complies with AS/NZS 4240 standard.

As per standard every output includes two switches A&B in series with monitoring feedbacks from both.

Extra safety is achieved by using two potted boards where each includes main and watchdog processors monitoring correctness of executed main software code.

Module Primary board - A25_B0MQP
Module Secondary board – A22_B0MZG

Mounting options can vary depending on customer requirements.

Specifications

- **Module Type:** Intrinsically Safe Input / Output with Display
- **Supply:** 12VDC (+/- 10%) / 20 Watts (Max) from Approved I.S. Power Supply
- **Data Communications:** CAN interface over Obelix Fibre
- **Operating Temperature:** -20°C to +85°C all industrial components
- **Outputs:** 4 x Danfoss Proportional Solenoid Outputs (Supply 12VIS/650mA , Control 3-9V)
- **Sensors:** 2 x Resolver Sensors - Litton or Siemens
- **Inputs 1:** 12 x 12VDC Digital Inputs
- **Inputs 2:** 12 x 4-20mA Analog Inputs High Resolution 12 Bit
- **Inputs 3:** 4 x 0-2.8V Analog Inputs High Resolution 12 Bit
- **Inputs 4:** 4 x Frequency Counters (to 5KHz)
- **Connector 1:** Obelix Fibre
- **Connector 2:** Obelix A25 (12VDC I.S. Supply and Danfoss Proportional Solenoid Outputs)
- **Connector 3:** Obelix A22 (Digital Inputs, Analog Inputs, Resolvers and Counters)
Heavy Duty Enclosure
- Electroless Nickel Plated
- Rugged Construction

Mass

Display Diagnostics

The integral 4 characters LED Matrix display provides the end-user with some basic diagnostics as to the operation of the module. These messages are as follows:

Message Explanation Result

ON
Omni Flashing Indicates nominal operation and signifies that CAN communications have been established with a host. Normal Operation Permitted

CAN
This indicates CAN Communication has not been established or has been lost. Outputs Disabled

FEBK
This indicates that internal is NOT congruent with requested outputs. This typically occurs when output has been requested but has failed to operate indicating a supply failure or wiring error. Outputs Disabled

SHRT
This indicates that a short-circuit condition has been detected as a requested output. This short-circuit could be external (most probable) or internal Outputs Disabled

OPEN
This indicates that the requested output is not drawing sufficient current to operate as expected indicating that the solenoid coil is an open circuit. Outputs Disabled

H0M11001	Fibre Optic Patch Assembly 8 way 3m
H0M11201	Connector Assembly Fibre 8 way 12.5m

Image above Fibre Optic Patch ST-ST Multi-Mode

Specifications

- **Product Type:** Pre-manufactured cable assembly
- **Construction:** FIbre Optic with ST terminations
- **Connector 1 :** Fibre Optic Tx
- **Connector 2:** Fibre-optic Rx
- **Pin Type:** ST Fibre Plugs
- **Conductor Type:** Multi-mode Fibre-optic
- **Insulation Rating:** N/A
- **Temperature Rating:** -40$^{\circ C}$ to 85$^{\circ C}$

Connector Assembly

Part Number	Description
H0LZ0201	Connector Assembly A22 2.2m
H0LZ0401	Connector Assembly A22 1.5m
H0LZ0402	Connector Assembly A22 1.5m (Small Case)
H0LZ0403	Connector Assembly A22 1.5m Fully Populated
H0MQ0101	Connector Assembly A25

Specifications

- **Product Type:** Pre-manufactured cable assembly
- **Construction:** Connector with flying leads (pigtail)
- **Pin Type:** Male (Gold-plated)
- **Conductor Type:** PVDF Tinned Stranded Wire
- **Insulation Rating:** 600 volts
- **Temperature Rating:** -65 to 105 C
- **Recommended Tools:** PVDF / Teflon Insulation Stripping Tool

Cable options can vary depending on customer requirements.
